**The RE251 Hidden Panic** can arm, disarm, and generate panic signals for the security system.

**Features**
- Hidden mounting
- 1-button arming and disarming
- Large, easy to differentiate button
- Mounts in hidden locations via VHB™ tape or screws
- Strong, reliable RF signal
- 4-6 year battery life with Panasonic™ CR2032 battery

**Enrollment**
- Put the control panel in program mode
  - Note: refer to the Honeywell control unit installation manual
- Go to Key in Programming
- Press “Add New”
- Change the key type to “1 Button”
- Select a user in the user setting
- Press Serial Number
  - Press the intended button
  - Wait five seconds, press the button again
  - Wait five more seconds, press the button a third time
- Verify the Button Key and Loop Number
- Correlate, refer to the diagram

**Battery Replacement**
- Insert screwdriver to open
- Unscrew circuit board from housing
- Remove old battery and place new CR2032 battery positive side up

**Pro Tips**
**3M VHB Tape** works well if the surface is properly prepared and firm pressure is applied for over 10 seconds.

**Surface Preparation**
- Clean the surface
- Ensure the mounting surface temperature is above 50°F

---

*Use the panel installation guide to verify proper system setup.*
