

Take your home with you wherever you go

An Alula Smart Security System and the Alula Security App help you stay connected to what's going on throughout your entire home - inside and out. View live and recorded video and interact with visitors at the front door. Turn on the lights or adjust the thermostat. Monitor for water leaks and breaking glass.

Maintain peace of mind with the health of your home in your pocket and with you at all times.

Live view

Want to check in on the house while you're at work? See what's happening in real-time with a live stream from each camera or catch up on the day's events with recorded clips.

Smart device control

Turn up the thermostat, lock the front door or turn off the living room lights, right from your phone with the click of a button or with automated scenes.

In the know

Receive a notification whenever a door or window opens or closes, when glass breaks or when motion is detected - both inside and outside your home.

Your app, your way

Customize the home screen for quick, at-a-glance access to what's most important to you.

Easy, unified control

The controls for the Alula Security App are the same as the 7" dedicated touchscreen, making it easy to get the most out of your system.

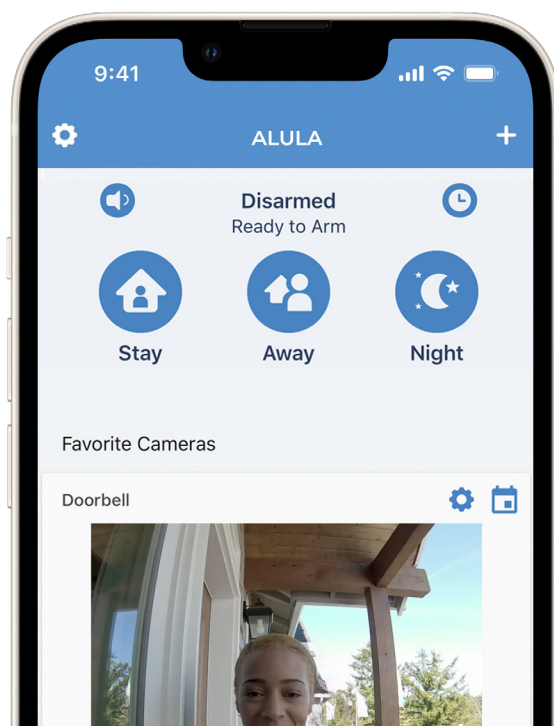

Lightning fast

Unlike other systems, you'll know instantly that your light turned on or that the door locked with our ultrafast, encrypted network.

Backed by professionals

Away from your phone? No worries, having a professional on call 24/7 means you never have to worry about missing something important.

Contact an Alula dealer to learn more about the Alula Security App today.
