

# Using your Smart Devices with Alula

An Alula Security System keeps pace with your smart, connected home. Turn on or off smart lights, lock or unlock doors and control all your Z-Wave smart devices right from your phone or touchscreen control interface. Plus, you can create scenes to do things like turn on the lights and unlock the door when the garage door opens.

- Home automation devices are sorted by type
- You can toggle devices on and off or use sliders to control a device's setting
- Tapping on the device card opens up the device details screen and allows you to edit and make customized settings for that device
- To add a device, touch the **+** symbol on the device and then follow the device instructions for including it on your network
- To remove a device, click the **triple stacked dots** next to the + and select *Remove a Device*, then follow the device instructions for removing it from your network

See reverse side for managing scenes →

# Scenes

Scenes act as if/then statements and use triggers, optional conditions and actions to automate smart device functions.

## Trigger

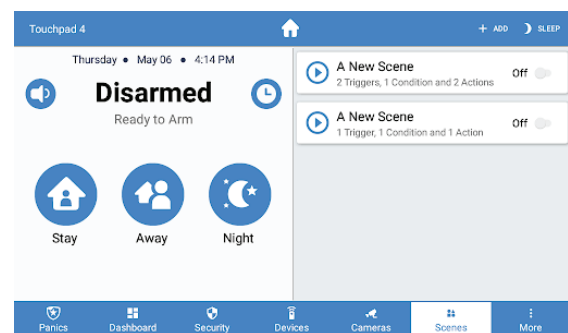

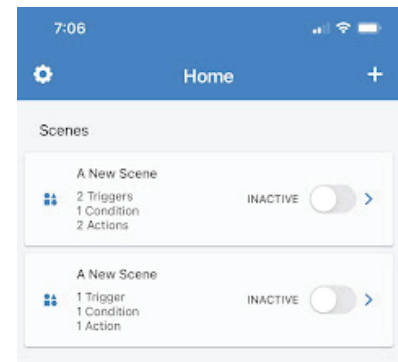

A change in surroundings, or an action that causes another action to occur, e.g. when motion is detected

## Condition

When certain other factors are occurring, e.g. between sunset and sunrise. Conditions are not required to create a scene

## Action

The new state of your smart device(s)

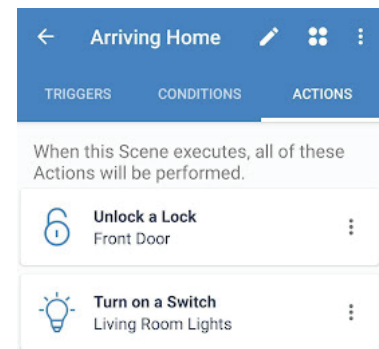

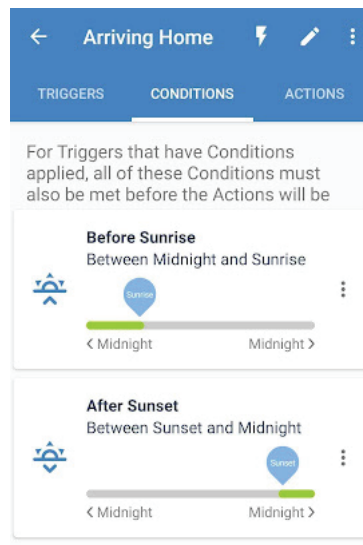

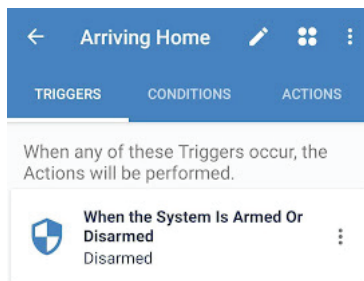

## Example Scene

**Trigger:** When the system is disarmed

**Condition:** Between sunset and sunrise

**Action:** Unlock the front door and turn on the living room lights

This scene will unlock the front door and turn on the living room lights (**action**) when the system is disarmed (**trigger**) when it is between sunset and sunrise (**condition**).
