

## Frequently Asked Questions

Q - Are there special wiring and voltage requirements?

A - Nope. The doorbell works with 16-24VAC transformers, standard in most modern homes. It uses existing doorbell wiring.

Q - Are there certain types of doorbell chimes that will work with the Alula Video Doorbell?

A - The doorbell is compatible with most modern digital and standard mechanical chimes. A wireless doorbell chime kit is available from Alula.

Q - What are the Wi-Fi requirements for connecting to the Alula Video Doorbell?

A - The doorbell works with 2.4 GHz Wi-Fi networks. For optimal performance, locate your wireless access point as close as possible and with a minimal number of walls or other signal obstructions.

Q - How am I alerted when there's activity at my front door?

A - Instant notifications will be delivered through the Alula App on your mobile device when motion is detected and when the doorbell button is pressed. Pressing the button on the doorbell camera will also operate the connected chime within the home.

## Doorbell Camera

### Stay Connected

Easy setup using in-home Wi-Fi and existing doorbell wiring

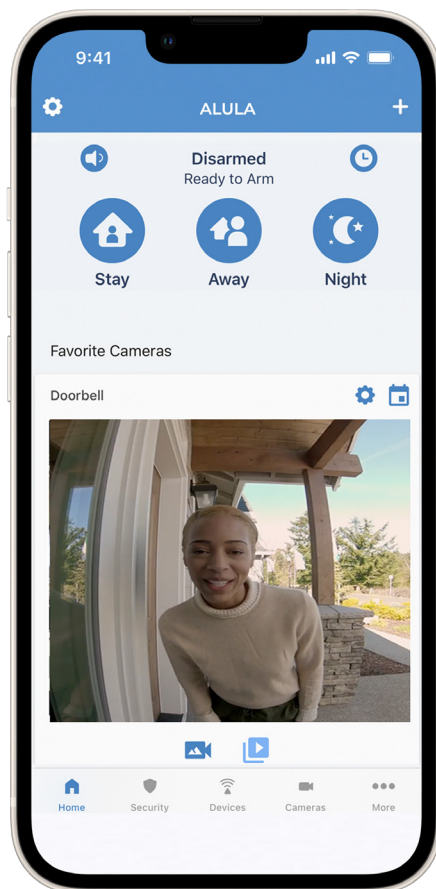

Two-way audio for interacting with visitors at your doorstep

Day/night modes with infrared night vision

1080p for premium-quality live viewing and recorded clips

### MOTION CAPTURE

Video clips are captured when motion is detected or when the doorbell button is pressed.

### PERFECT VIEWS

Captures every person or package at the threshold, thanks to a 140° vertical field of view. Two angle brackets are included to customize the angle of your doorbell.

### NEVER LOSE A CLIP

With the Alula Network, clips are automatically saved to the cloud for instant recall. The doorbell also comes equipped with a 16GB MicroSD card for redundant storage.

### MADE FOR THE EXTREMES

With an IP55 weatherproof rating and an operating range of -20°F to 140°F, working in wet, inclement weather is a walk in the park.

## Smart Solutions

The Alula Doorbell Camera can be used as a standalone device or incorporated into a comprehensive smart security solution that's all managed through the Alula app.

- » Security and life safety sensors
- » Control of smart lights, thermostats, locks, and more
- » Trigger automated scenes and use timers and schedules
- » Indoor and outdoor cameras

## Alula Mobile App

Download the Alula Mobile App on any iOS or Android device for fast and easy access to live and recorded video footage.

- » Receive activity notifications when motion is detected
- » Interact with visitors from virtually anywhere from the convenience of your cell phone
- » View recorded content, download videos, and capture images of interest
